

Football Analytics API (0.1.0)

Download OpenAPI specification: [Download](#)

REST API for football analytics and favourite player lists. All `/api/v1` endpoints require `X-API-Key` header.

Root

Redirect to frontend at /app/.

Responses

> **200** Successful Response

GET /

Response samples

200

Content type
application/json

null

Copy

App Redirect

Redirect /app to /app/ so relative assets resolve correctly.

Responses

> 200 Successful Response

GET /app

Response samples

200

Content type
application/json

Copy

null

App Index

Serve frontend index.html so /app/ loads the app; uses absolute path from project root.

Responses

> 200 Successful Response

GET /app/

Response samples

200

Content type
application/json

null

Health

Health check for deployment and load balancers.

Responses

> 200 Successful Response

GET /health

Response samples

200

Content type
application/json

{ }

API v1 root

Protected by X-API-Key; use for auth testing.

AUTHORIZATIONS: > *APIKeyHeader*

Responses

> 200 Successful Response

GET /api/v1

Response samples
